# EARTHQUAKE ENGINEERING and STRUCTURAL DYNAMICS

The Journal of the International Association for Earthquake Engineering

## General Editor:

**Professor Ray W. Clough**, Director, Earthquake Engineering Research Center, University of California, 1301 South 46th Street, Richmond, California 94804, U.S.A.

## Associate Editor:

**Professor Geoffrey B. Warburton**, Department of Mechanical Engineering, University of Nottingham, University Park, Nottingham NG7 2RD.

## Advisory Editorial Board:

**Dr. NICHOLAS N. AMBRASEYS**,  
Imperial College of Science and Technology,  
University of London,  
London S.W.7.

**Professor J. H. ARGYRIS**,  
Department of Aeronautics,  
Imperial College of Science and Technology,  
Prince Consort Road,  
London SW7 2BY.

**Dr. ARTURO ARIAS**,  
Professor of Structural Engineering,  
University of Chile,  
Santiago, Chile.

**Dr. J. FERRY BORGES**,  
National Laboratory of Civil Engineering,  
Avenida do Brasil,  
Lisbon 5, Portugal.

**Professor A. G. DAVENPORT**,  
Faculty of Engineering Science,  
The University of Western Ontario,  
London 72, Ontario, Canada.

**Dr. LUIS ESTEVA**,  
Instituto de Ingeniería,  
Universidad Nacional Autónoma de México,  
México 20, D.F., Mexico.

**Dr. RODRIGO FLORES**,  
Professor of Structural Engineering,  
University of Chile,  
Santiago, Chile.

**Professor GIUSEPPE GRANDORI**,  
Istituto di Scienza e Tecnica delle Costruzioni,  
Politecnico di Milano,  
Italy.

**Dr. GEORGE W. HOUSNER**,  
Professor of Civil Engineering,  
California Institute of Technology,  
Pasadena, California 91109, U.S.A.

**Mr. D. A. HOWELLS**,  
Sir William Halcrow and Partners,  
London.

**Dr. PAUL C. JENNINGS**,  
Professor of Applied Mechanics,  
California Institute of Technology,  
Pasadena, California 91109, U.S.A.

**Dr. JAI KRISHNA**,  
President, International Association for Earthquake  
Engineering,  
Vice Chancellor,  
University of Roorkee,  
Roorkee, U.P., India.

**Dr. J. KAZUO MINAMI**,  
Secretary General, IAEE,  
Professor of Architecture, Waseda University,  
Tokyo 160, Japan.

**Dr. KIYOSHI MUTO**,  
President, Muto Institute of Structural Mechanics,  
Tokyo, Japan.

**Dr. NATHAN M. NEWMARK**,  
Professor of Civil Engineering, Emeritus,  
University of Illinois,  
1211 Civil Engineering Building,  
Urbana, Illinois 61801, U.S.A.

**Dr. SHUNZO OKAMOTO**,  
University of Saltama,  
Shimo-Ogubo 255,  
Urawa-City, Japan.

**Professor JOSEPH PENZIEN**,  
Earthquake Engineering Research Center,  
University of California,  
Richmond, California 94804, U.S.A.

**Dr. S. V. POLIAKOV**,  
Deputy Director of TsNIISK,  
Gosstroy of the U.S.S.R.,  
Moscow, U.S.S.R.

**Professor FRANK RICHART**,  
Department of Civil Engineering,  
University of Michigan,  
Ann Arbor, Michigan, U.S.A.

**Mr. JOHN E. RINNE**,  
Vice President, Earl and Wright Engineers,  
San Francisco, California 94105, U.S.A.

**Professor R. T. SEVERN**,  
University of Bristol,  
Department of Civil Engineering,  
Queens Building, University Walk,  
Bristol BS8 1TR.

**Dr. R. IVAN SKINNER**,  
Department of Scientific and Industrial Research,  
Physics and Engineering Laboratory,  
Private Bag, Lower Hutt, New Zealand.

**Mr. KARL V. STEINBRUGGE**,  
Insurance Service Office,  
465 California Street, San Francisco,  
California 94104, U.S.A.

**Professor O. C. ZIENKIEWICZ**,  
Department of Civil Engineering,  
University College of Swansea,  
Singleton Park, Swansea SA2 8PP.

1. The first part of the paper discusses the importance of the medical profession in the United States. It points out that the medical profession is one of the most important and most respected professions in the country. It is a profession that has a long and honorable history, and it is one that has made many contributions to the health and well-being of the American people.

2. The second part of the paper discusses the current state of the medical profession in the United States. It points out that there are many challenges facing the medical profession today, including a shortage of doctors, a lack of funding for medical research, and a growing emphasis on profit over patient care.

3. The third part of the paper discusses the author's views on how the medical profession can address these challenges. He argues that the medical profession must first and foremost be committed to the health and well-being of its patients. He also argues that the medical profession must work to ensure that there are enough doctors to meet the needs of the population, and that there is enough funding for medical research.

4. The fourth part of the paper discusses the author's views on the role of the medical profession in society. He argues that the medical profession has a responsibility to promote the health and well-being of the entire community, not just its individual patients. He also argues that the medical profession should work to address the social and economic factors that contribute to poor health.

5. The fifth part of the paper discusses the author's views on the future of the medical profession. He believes that the medical profession has a bright future, but that it must first address the challenges it faces today. He believes that the medical profession must be committed to the health and well-being of its patients, and that it must work to ensure that there are enough doctors to meet the needs of the population.
